1st February 2021 - Whitelist

Executive team to provide 4 ETH liquidity plus whitelist for 50 spots at 1 ETH each. Initial 54 ETH liquidity.

No centralized risk.

Fully decentralized liquidity from day 1.

- We'd like users to be confident liquidity won't be pulled. So we're going to do a whitelist for 50 spots at 1 ETH each. They will be provided with a very generous GRTD package. Please contact our CEO if you'd like to become a funding partner.
- That way on launch there will be 54 LP holders (whitelist + executive team)

14th February 2021 - UNISWAP presale

0.005\$ (50% below predicted market price) 3.65 million coins on presale followed by a fair launch. Liquidity provided by executive team and whitelisters will be extraordinarily decentralized so that nobody has control over the LP.

Summarising: Presale followed by fair launch, direct Uniswap listing, but with decentralized liquidity ownership. Team is focused on making this a long-term sustainable protocol with high ROI.

14th February 2021 – General public launch + dev progression

1) Promotion of GRTD:

- Announcements in our social media
- AMA session with our community to increase their trust and interest in \$GRTD

2) Complement DEX with Exchange options using 25% of liquidity to trade in first USDT market to sell tokens, achieve exposure to diverse markets.

- USDT is the best option for the first market, because it's stable and it'll be much easier to build an attractive trading environment.

3) Creation of an attractive trading environment:

- low spread (<1%)
- filled orderbook — many orders on buy/sell
- normal-high volumes
- active trading chart — price action shapes, patterns, entry points for traders
- 0% fees for exchange community (2 weeks)

All these will help us bringing new users to GRTD and increase organic liquidity immediately.

4) Conduction of a Trading Competition, to engage more traders and much more increase organic trades.

- Users will compete, who will generate the biggest profit on \$GRTD trades. Users can get profit on spot trading only when the price of asset growth. So, they will push the price of your token UP.

5) Run the SMART-staking, 2 plans.

- This way we'll engage non-active traders, crypto-enthusiasts to buy \$GRTD and hold it.
- It's perfect, we solve 2 tasks:
 - Increase number of token-holders
 - Prevent price-dumps
